If more site #'s are needed please save the document (change the name) and open a new one. Please include as much information as possible when submitting . All damages must have occurred on/after 4/11/2023 and be caused by the overland flooding from the snow melt in some way. As of 4/30 the state has not declared a disaster. This means that all of the submissions are so we can be 'ahead' and not behind. Please take pictures of the damage- we will not need them right away, but if a disaster is declared FEMA may request them. It is understood that completed work may not have pictures. If there are any questions please call/text MCEM @ 605-448-2339 or email @ mcem@venturecomm.net. I will reply with 'received' when this completed form is emailed to the MCEM email. If you don't receive that email please reach out to make sure I received it.

Thanks! -Logan R., Director- MCEM
